

# Medical Writer

## PhD Career Insights

Medical Writers use their scientific background and excellent communication skills to help share scientific knowledge with both expert and non-expert audiences in a variety of ways.

### What would I do?

- Write for scientific/medical or lay audiences
- Author research posters, abstracts, and papers; literature reviews, white papers and monographs
- Prepare documents for regulatory authorities
- Author research protocols
- 
- Write medical device instructions for use
- Write press releases, marketing brochures, or advertising copy for medical device and pharmaceutical companies
- Edit for content, style, grammar, or fact-checking
- Design educational materials for patients or continuing medical education courses
- Write books or textbooks
- Write online content for blogs, e-learning, or company websites
- Make training materials for sales representatives
- Research and write news articles on scientific and medical topics
- Work with engineers or bench scientists to help communicate their knowledge
- Use project management skills to balance workload, scope, cost, and scheduling needs
- Perform systematic literature searches using PubMed and other research-focused search engines
- Read scientific and clinical research papers and summarize their content for non-experts

## **Where could I work?**

- Freelance
- Clinical/contract research organizations (CRO)
- Medical device companies
- Media outlets that cover health news (newspaper, magazine, website)
- Medical education companies
- Public health organizations
- Pharmaceutical companies
- Medical or research non-profits
- Continuing medical education companies

## **What skills should I have?**

- PhD or MD with writing experience, or a journalism degree with a science background
- Medical or technical writing degree or certificate are beneficial
- Love of writing and ability to translate complex ideas into simple, clear language
- Excellent command of English grammar and style rules
- Understanding of drug approval process and ability to interpret clinical trial data
- Project management skills
- Ability to work in a variety of writing environments (Microsoft Word/PowerPoint, Adobe FrameMaker and other XML-based authoring systems, websites and HTML-based authoring systems)
- Ability to edit your writing and others' writing
- Good time management skills and ability to juggle multiple assignments simultaneously
- Networking skills to seek out and meet new clients (if freelance or consultant)
- Knowledge of medical and scientific terminology

## **What is the salary range?**

- Entry-level salary - \$60K
- Average salary - \$70-\$90K
- Experienced or senior-level salary - \$90-\$110K
- Average salary in Pharma is \$110K

*\*Note: although similar, “medical writer” positions usually pull in a higher salary than “technical writer” positions, even though technical writers can work in the medical field. This reflects the assumption that a medical writer has more specific education in the science or medical field, possibly an advanced degree.*

## **Where can I find out more about Medical Writing careers?**

- [American Medical Writers Association – Toolkit for new Medical Writers](#)
- [Science Careers – Working as a Medical Writer](#)
- [Perspectives in Clinical Research – How to Become a Competent Medical Writer?](#)
- [Science Careers – Careers in Medical Writing: Opening Doors](#)

## **How can I improve my writing?**

There are some sources on-line that can help improve your writing. We recommend you enhance your skills and seek feedback on your writing before starting a blog or contributing content that will be in the public domain and represent your writing “brand”.

- [Graduate School Scientific Writing Resource](#) - Duke University
- [Purdue Online Writing Lab](#) hosts a long list of topics from transitions to conciseness and has a section specifically targeted at medical writing.
- Gopen, G.D., and Swan, J.A. (1990) [The Science of Scientific Writing](#). American Scientist 78: 550-558.
- [“Scientific Writing, Easy When You Know How”](#) by Jennifer Peat
- Consider more formal training such as a degree or certificate. Johns Hopkins has both an MA in Science Writing and a Graduate Certificate in Science Writing (classes are fully online). The University of Chicago Graham School of Continuing Liberal and Professional Studies offers a Medical Writing and Editing certificate, and MIT offers a one-year Master’s degree program in Science Writing.
- Johns Hopkins Center for Leadership Education offers writing courses tailored for International Students: Research Writing for International Students and Professional Writing and Communication for International Students.

## **How can I gain skills and experience for a career in Medical Writing?**

- Find opportunities to practice medical writing to build your portfolio of writing samples, or “clips.” Determine what sort of medical writing suits your skills and your passion (expert audience or lay audience, print or digital media, etc.). It’s good to experiment with different types and gain experience in multiple areas.
- Learn how to use software such as Adobe FrameMaker or how to write in XML or HTML.
- Learn how to perform a systematic literature search using PubMed, Google Scholar, or other medical and scientific search engines.
- Build knowledge about the clinical research process – how to design, register, run, monitor, and publish a clinical trial
- Familiarize yourself with the types of documents needed for a regulatory body, such as Investigational New Drug applications, 510(k) applications, Premarket Authorizations, Clinical Evidence Reports, and Technical Files.
- Familiarize yourself with [regulatory guidelines](#), especially [Good Clinical Practice](#)
- Practice writing about your own research for different audiences, including expert scientist, non-expert scientist, and lay audiences
- Edit research paper manuscripts for your classmates or lab-mates, or by working with a company such as American Journal Experts.
- Start a blog or podcast where you talk about interesting science and medical research

## **Where can I find Medical Writing internships or fellowships?**

- Sometimes, the Johns Hopkins Office of Media Relations or the American Society for Biochemistry and Molecular Biology will take interns on a case-by-case basis. Contact the editor or director to inquire about opportunities.
- Local non-profits for diseases, including the Sickle Cell Disease Association of America (SCDAA) will sometimes hire interns to manage web content such as Twitter or Facebook feeds. Contact SCDAA to inquire about opportunities.
- The National Cancer Institute offers a [Health Communications Internship Program](#).
- The National Association of Science Writers offers an [internship fair and a mentoring program](#).

## **What professional organizations can I join?**

Join a professional society as a full student member (most have reduced pricing and/or scholarships available for fledgling members) to connect with other medical writers and gain access to resources such as members-only articles, job postings, email lists, and more.

[American Medical Writers Association](#)  
[National Association of Science Writers](#)  
[Society for Technical Communication](#)  
[DC Science Writer's Association](#)
